**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Strong winds combined with damp conditions will give an enhanced chill despite relatively mild conditions.

Forecast for Saturday 20 Nov 2021
Weather: Heavy rain through the early hours and much of the morning. This turns briefly to snow above 900m before clearing south late morning. Colder clearer conditions then follow, but with frequent showers, falling as snow above 700-800m. Showers soon turn heavy near the north and west coasts with a risk of thunder late afternoon and evening.

Maximum wind: West 20-25 gusting 35-40 mph, becoming Northwest by evening.

Chance of cloud free mountain/hill tops above 800m: Nil early to mid-morning, 40-50% in the afternoon and evening.

Visibility: Poor much of the morning in low cloud, bases around 300-400m, 500-600m in the east. Variable in the afternoon, poor in passing low cloud and showers, but very good outside of these. Frequent cloud above 800-1000m.

Temperature: **Glens:** Plus 10 Celsius falling to plus 7 Celsius in the afternoon, and plus 5 Celsius in the evening.
At 800m: Plus 4 Celsius, falling to 1 Celsius in the afternoon.
Freezing level: Above the summits, falling to 1100m by mid-morning, 900m by evening.
